

Comfortable Space Heating with a Hydronic Furnace

AIRMAX
TECHNOLOGIES

MAXAIR LV PRODUCT BENEFITS

MAX COMFORT

- Hydronic Heating using a hot water coil delivering comfortable, efficient heat to your home.
- Your home is less dry than a typical gas furnace.

MAX ENERGY SAVINGS

- Optional ultra high efficient electronic commutated motor (ECM) to produce constant air circulation using very little energy.
- Hydronic furnace requires no venting or gas lines with reduced installation costs.

MAX FLEXIBILITY

- Multi-position and flexible installation (basement, closet, crawl space or attic) used in new construction and retrofit applications.
- Can accommodate cooling, humidifiers, hrvs and whole house air cleaners while utilizing conventional ducting systems.
- Hydronic Air Handler can accommodate most brands of cooling coils and chilled water coils. This allows HVAC professionals to use the equipment of their choice.
- Must be matched with a dual purpose tankless hot water heater, boiler, water heater or heat pump.
- Three compact sizes ranging from 25,000 BTU to 153,590 BTU and from 1 to 4 tons of cooling.
